

**BRYSTON**

## THE NEW **BDA-3** Digital to Analog Converter

Bryston's new BDA-3 DAC not only advances the state of the art for PCM playback, but sets a new high standard for DSD as well.

Separate signal paths were engineered specifically for high resolution PCM and native DSD. Audio is processed in their native format with no conversion ensuring each song is totally bit perfect—an exact replica of the master recording.

Hear our new high standard for music playback at your Bryston dealer.

- PCM** up to 384 / 32
- DSD** up to x4 (DSD256)
- HDMI** 2-Channel including SACD
