Chord Poly Wireless Streamer
Using BubbleUPnP with MicroSD

BubbleUPnP is an app for Android designed to control and listen to music on UPnP/DLNA players like Chord Poly. This guide will help find and play music from a MicroSD card or other UPnP/DLNA servers. This guide assumes you already have a Micro SD card formatted in ExFAT, loaded with music, and installed into Poly.

Chord Poly Wireless Streamer
Using BubbleUPnP with MicroSD
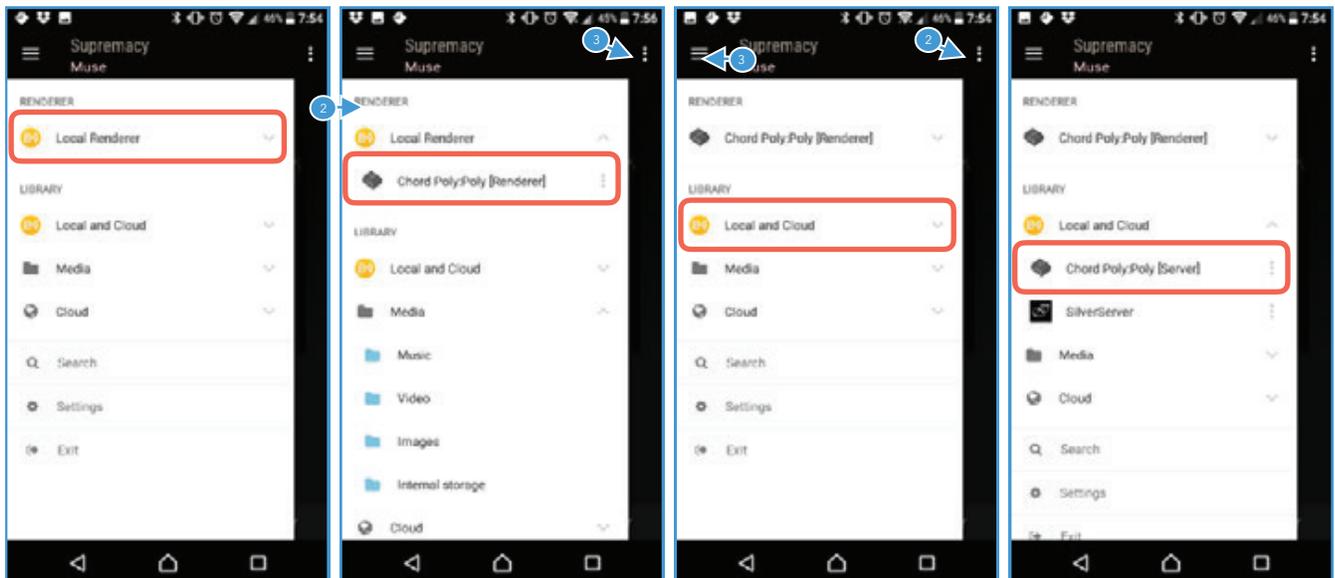

1. BubbleUPnP can control UPnP/DLNA network music players or also called renderers. It can also find and play back music from UPnP/DLNA servers. To start, tap on Local Renderer.

2. A list of available UPnP/DLNA renderers should appear. Choose Chord Poly [Renderer].

3. Playback is now set to send audio to Poly. Next, set up the source location. When a MicroSD card is inserted into Poly, it becomes aUPnP/DLNA server and should be available. First, tap on 'Local and Cloud.'

4. A list of available UPnP/DLNA servers will appear. Choose Chord Poly [Server].
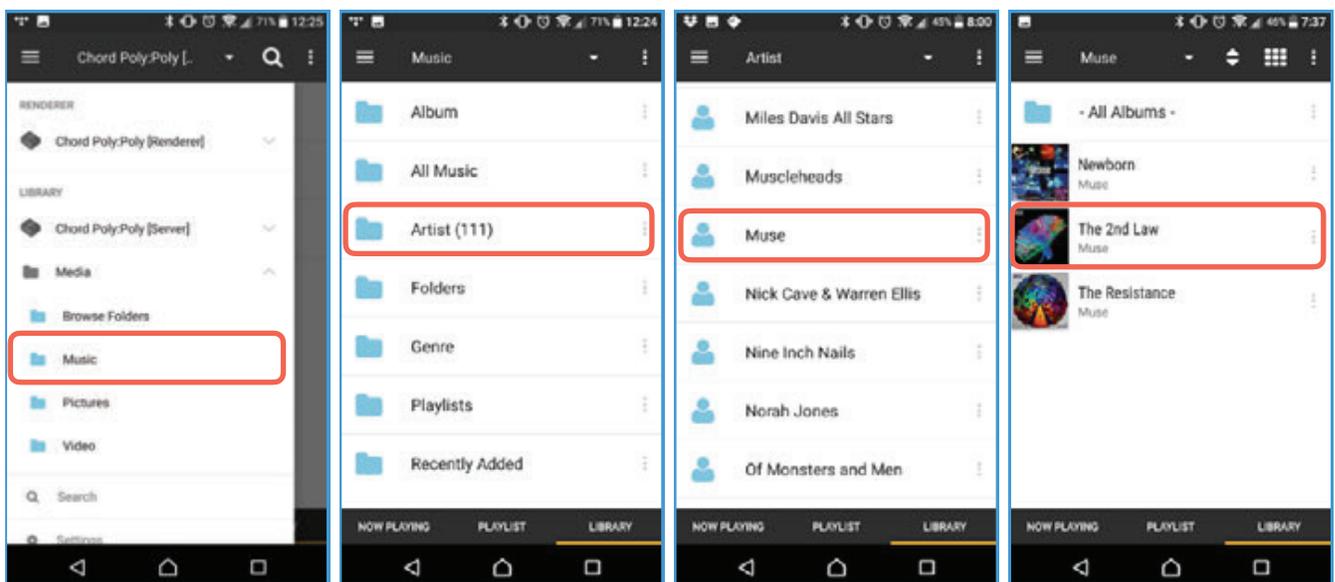

5. Now that a library is chosen, let's find music to play. Start by tapping the 'Music' folder.

6. On this screen you can look for music in many different ways, like Album, Genre, or even raw file folders. For now, select Artist.

7. We can now see a list of Artists. Tap on any artist to see available albums.

8. In this example, we are inside the artist's folder and there are three albums available. Tap on any album to see the available tracks.
